This Agricultural Land Use Inventory (ALU) System employs a "visibility" survey method which captures data  
visible from publicly accessible lands and roads. Where visibility is limited, data may have been interpreted  
from aerial photography in conjunction with local knowledge. This data represents a snapshot in time of  
land cover and land use on agricultural lands. Land parcel ownership, land use and land cover may have changed  
since the data was collected. Land use data is not intended for regulatory purposes or environmental  
assessment. For more information, please contact the Bulkley Nechako Regional District or the  
Vanderhoof Land Use Inventory Report for more information on data limitations.
